

# Gloves and Cosmetic Hands

Steeper offers a range of cosmetic/ passive upper limb solutions, including artificial arm and artificial hand products to suit infants through to adults.

From Elegance gloves for functional hands, to cosmetic and foam filled products, Steeper provides clinicians with a wide range of options to best suit their patients.

## TrueFinish™ Swatch

### 19 TrueFinish™ Colour Shades

For Steeper gloves, the following 19 shades are available in Standard finish or the advanced TrueFinish™ micropigmentation, for enhanced realism and depth.

E0	E1	E2	E3	E4	E5	E6	E7
E8	E9	E10	E11	E12	E13	E14	E15
E16	E17	E18	Swatch colours are for indication only.				

To help you select the most appropriate colour of glove, swatches are available and supplied without charge. These are manufactured from production silicone for the most accurate colour matching and will not fade or discolour over time.

Swatch part numbers are as follows:

- E24655 - Glove Colour Swatch - TrueFinish™
- E24654 - Glove Colour Swatch - Standard

To request swatch samples or to place an order for Steeper TrueFinish™ Covers or Gloves, please contact [customerservices@steepergroup.com](mailto:customerservices@steepergroup.com).

## Elegance Gloves

These full-length gloves are designed to fit Steeper electric and mechanical hands, in addition to functional hands from other manufacturers.

Elegance gloves are produced in a long-mould length, designed to withstand the rigours of functional activity.

### Elegance PVC

Elegance PVC gloves provide a cost effective solution for electric and mechanical hands when the extra toughness of PVC is required.

### Elegance Silicone

By using our innovative polymer, Elegance silicone gloves offer the toughness associated with PVC but provide the ease of cleaning provided by silicone. This material allows additional stretch, reducing the energy expended by the hand motor each time it opens. Properties of this polymer, proven by clinical evaluation, include improved tear resistance and up to 15% stretch to allow even bulbous sockets to be accommodated. All Elegance silicone gloves are easy to fit and remove, allowing quick access to the hardware for maintenance and adjustment, whilst being simple to keep clean using soap and water.

### Features and Benefits of Elegance Gloves:

- Available in PVC or silicone
- Tough interface
- Superior cosmetic finish with detail included and long glove length
- Uninhibited hand function
- Toughness associated with PVC, and the ease of cleaning provided by silicone
- Easily donned/doffed
- Extra length as standard in 7 styles
- A choice between the standard colour range or the advanced micropigmentation, TrueFinish for added realism and depth

Available in 19 colour shades, 5 sizes and 7 styles

## Cosmetic Gloves

Steeper cosmetic gloves are available in silicone and PVC, compatible with Steeper's and other manufacturers' cosmetic hands.

Available in Standard or TrueFinish™ colours.

### Features and Benefits of Cosmetic Gloves:

- Compatible with Steeper's and other manufacturers' cosmetic hands
- Available in silicone and PVC
- Available in Standard or TrueFinish™ colours
- TrueFinish™ features unique micropigmentation for a more lifelike appearance – available in 19 colours
- HD nails for added definition and realism
- PVC and silicone gloves impermeable to water
- Available in a variety of styles based on hand size and gender

### Unique Features of Silicone Cosmetic Gloves:

- Resists everyday staining and soiling and can be easily cleaned with soap and water
- Highly elastic, flexible and improved tear strength
- Softer to touch for added realism

### Unique Features of PVC Cosmetic Gloves:

- Proven durability and resistant to wear and tear
- Zip fasteners can be fitted, which is particularly suitable for partial hand gloves
- PVC gloves can be pre-formed with gentle heating stretching, making it easier for some applications

### Partial Hand Gloves

Several popular glove sizes are also available with a wider wrist and are recognisable by the identifier PH. E.g: TG3PH - TrueFinish™ PVC, 3 1/4" Left Wide Wrist

These can be used for partial hand patients who require a cosmetic replacement. The wider wrist allows the residual limb to fit inside the glove and the remaining void can be filled with a soft filler.

For partial hand patients where the residual limb will not fit inside the glove, a zip may be fitted to CG and TG gloves. Please contact customer services for a special order form or to discuss your requirements.

## Cosmetic/Passive Hands

Ideal for users who place great importance on cosmetic appearance and system weight, the advanced materials and manufacturing techniques used to produce these hands ensure detailed, lightweight and durable solutions.

These hands are designed for dress purposes only and are intended for use with Steeper cosmetic gloves and high definition silicone covers.

### Standard Foam Hand Features:

- Made from flexible skinned lightweight foam around a metal skeleton mounted on a plastic base
- Passive fingers but the skeleton allows for individual digits to be positioned manually
- Robust construction for positioning
- Easy connection to oval or round wrists, or M12 threaded studs

### Extended Wires Foam Hand

An additional range of cosmetic hands is also available - with extended wires and no internal base, to construct robust cosmetic prostheses for partial hand or wrist disarticulation patients.

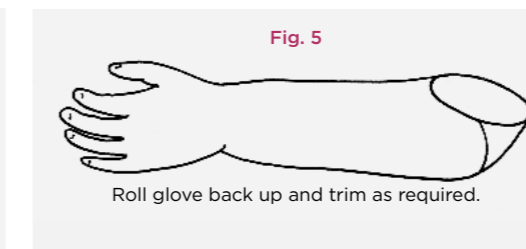

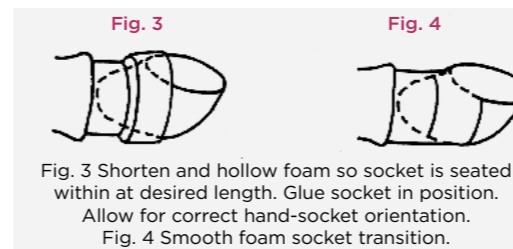

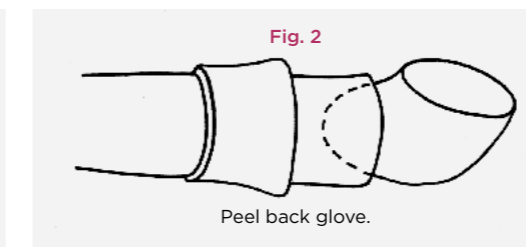

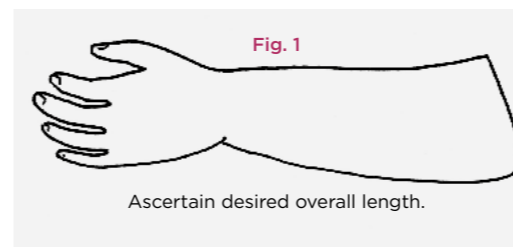

A socket with a tie plate (B05864) is fabricated and the hand is shortened to the appropriate length, the extended wires are trimmed and passed through the tie plate. Foam may be added to smooth the transition between socket and hand before the cosmetic glove is fitted.

Bend over and twist to secure

### Manufacturing Guide

## Infant Foam Filled Gloves

An infant's first cosmetic prosthesis can be fitted as early as two months of age. A foam-filled cosmetic glove can enhance the child's stability, and begin to familiarise them with wearing an external prosthesis.

This durable and resistant PVC solution also can assist child development through crawling and play activities.
